> 产品概述 Product overview

开合式户外防水穿刺互感器，本系列互感器最大的特点就是防水功能，可以在户外使用，他的切面端口采用橡胶垫环绕阻止雨水进入，当然市面上大多数号称防水的互感器都使用了橡胶垫这一手段，但光采用这个手段进行防水也有局限性，因为无法保证互感器本身的防水，而我公司采用了互感器一次成型的技术，就是将互感器直接在模具中做成实体，塑料毫无空隙的包裹全身，同时二次侧引线采用防水端子及护套线，保证没有一丝雨水能够进入互感器机体，经过权威机构测试，我公司互感器防水等级达到了IP67/IP65。本产品产品符合标准GB20840.1.2部分要求。

Open-close outdoor waterproof puncture transformer is the waterproof function, which can be used outdoors. Its section port is surrounded by rubber pads to prevent rain from entering. Of course, most so-called waterproof transformers on the market use rubber pads as a means, but there are also limitations in using this means for waterproofing. Because it is impossible to guarantee the waterproof of the transformer itself, our company adopts the technology of transformer forming once, that is, the transformer is directly made into a solid in the mold, and the plastic is wrapped around the whole body without any gap. Meanwhile, waterproof terminals and sheath lines are used in the secondary side leads to ensure that no rain can enter the transformer body. Our company transformer waterproof grade has reached IP67/IP65. This product meets part of the standard GB20840.1.2.
